```java
package net.wiredclub.translation;

public class TranslationException extends Exception {

    private final TranslationStatusCode statusCode;

    public TranslationException(TranslationStatusCode statusCode) {
        super();
        this.statusCode = statusCode;
    }

    public TranslationException(String message, TranslationStatusCode statusCode) {
        super(message);
        this.statusCode = statusCode;
    }

    public TranslationStatusCode statusCode() {
        return statusCode;
    }
}
```

```java
1 package net.wiredclub.translation;
2
3 public class TranslationFileNotFoundException extends TranslationException {
4     public TranslationFileNotFoundException(String message) {
5         super(message, TranslationStatusCode.STATUS_FILE_NOT_FOUND);
6     }
7 }
8
```

```java
package net.wiredclub.translation;

public class TranslationJsonProcessingException extends TranslationException {
    public TranslationJsonProcessingException(String message) {
        super(message, TranslationStatusCode.STATUS_JSON_INVALID);
    }
}
```
